

POLYCLIM 2200

DESCRIPTION

Single block climate regulator with standard and predefined functions

CLI5098

FUNCTIONS

Functions		Description	Number of outputs
	2 side ventilation and 1 roof pitch	Regulation proportional to ambient temperature Weather protection (wind, rain) Outside influences (wind, wind vane, outside temperature, sunshine) 24-hour temperature integration	4
	Inflation	Fan operation management by cue and difference Outside influence (wind speed)	1
	Alarm	Activation on an exceeded high or low threshold (temperature or humidity) or regulator operating fault (network, sensors disconnected, etc.). Output normally closed on power up	1

POLYCLIM 2200

THE SUPPLIED INDOOR SENSOR

COMPATIBLE WEATHER SENSORS

Photo	Ref	Measurement	Signal	Range
	Wind vane sensor			
	CAP0022	Wind direction	Dry contact	2 directions
	Wind sensor			
	CAP0021	Wind speed	Frequency	-
	Rain gauge sensor			
	CAP0030	Rain detection	DISCRETE	-
