

POLYCLIM NG 20A

DESCRIPTION

Single block climate regulator
with 12 24VAC relay outputs,
8 analogue inputs and
4 discrete inputs

FUNCTIONS

FUNCTIONS		Description	Number of outputs
	1 side or single pitch ventilation	Regulation proportional to ambient temperature Weather protection (wind, rain) Outside influences (wind, wind vane, outside temperature, sunshine) 24-hour temperature integration	2
	1 side or single pitch ventilation	Regulation proportional to ambient temperature Weather protection (wind, rain) Outside influences (wind, wind vane, outside temperature, sunshine) 24-hour temperature integration	2
	On-off heating (discrete)	Thermostatic regulation depending on the ambient temperature Possibility of managing a circulator at one water temperature separately from the unit heater.	1
	Inflation	Fan operation management by cue and difference Outside influence (wind speed)	1
	Air mixers	Thermostatic regulation depending on the ambient temperature and/or the ambient humidity Possible combination with the heating operation	1

POLYCLIM NG 20A

OPTIONS AVAILABLE (SUBJECT TO THE NUMBER OF REMAINING OUTPUTS & POSSIBLE MODIFICATION OF STANDARD FUNCTIONS)

FUNCTIONS	Description	Number of outputs	REF
Heating 3-way valve + circulator	Proportional regulation depending on the ambient temperature and the water circuit temperature Outside influences (wind, outside temperature, sunshine) Circulator management depending on the water circuit temperature. 24-hour temperature integration	3	CLI5500
FOG	Regulation proportional to ambient temperature and/or humidity Influence on the ventilation	1	CLI5503
CO2	Cue and difference management of CO2 injection operation Influence on the ventilation	1	CLI5504
Cooling	Management of a pump and 1 to 3 extractor units depending on the ambient temperature Influence on the ventilation	2 to 4	CLI5505
Clock / lighting	Start-up based on hourly start times or depending on connected sensors (adjustable thresholds). Applications: photosynthetic lighting, irrigation, etc.	1	CLI5506

CONNECTIVITY
